## Summary

Permanently adhesive and washable This mat is mainly used for the intensive pre-cleaning of contact surfaces of the shoe soles. Commonly it is used as the initial cleaning step before entering the cleanroom.

## Properties

- ▶ permanently adhesive and washable tacky mat
- ▶ binds coarse particles ( $\geq 10$  microns)

## Laying

- ▶ due to its weight it is possible to lay this mat directly onto an even floor if the floor is pre-cleaned and dry

## Cleaning

- ▶ cleaning is done with warm water
- ▶ for work safety reasons the mat can only be reused in dry condition. If necessary any remaining moisture has to be removed with a squeegee
- ▶ after drying, the mat regains its adhesion force again
- ▶ no solvent based cleaning agents should be used as these will destroy the adhesive properties of the mat
